

Activity Summary For Schools

Activity Summary

Setting up your school program ?

Don't stress! Our school programmers and hosts are here to help.

So the time has come to get your school camp organised, and this Activity Summary is a great place to start. It will outline all the adventure activities Burnside Camp can offer and the specifics you will need to know.

Our school programmers will be in contact with you approximately 8 weeks before your camp to help put together a program that suits your school's needs. Our staff are not only experienced in the outdoors, but also have great knowledge about what works and what doesn't work on a school camp.

If it is your first camp with us they will be able to give you the full run down of what we offer, and also write up a suggested program to get you started. We also welcome site visits for new schools which is a good chance to familiarise yourself with the site before your camp.

If you are a school that is returning to us then our school programmers will be able to discuss ways to improve your previous program and also give you a run down of the new programs we have developed since your last visit.

A couple of questions to consider when setting up your program:

- How many participants in your group?
- How many teaching staff are required for each activity?
- Do you want to utilise the beach for any activities?
- What are your arrival/departure times?
- Will you be using any outside providers for offsite programs?
- Will you require the use of our buses for transport to offsite programs?
